**Phase 2: Defect Log for My Critic**

#	Defect	Severity	Test Case # OR Description
1	<b>Incorrect registration button</b>	3	The registration button navigates the user to login, and the login button navigates the user to register.
2	<b>No redirect after login</b>	3	002 - User Log In with Correct Credential: After a user successfully logs in, they are not redirected away from the login page to their feed.
3	<b>Filtering appends to list</b>	2	013 - If a user filters their home feed to show a specific media type, it just duplicates the currently displaying list, and does not properly filter.
4	<b>Unfollowing fails</b>	1	013 - If a user tries to unfollow someone, the button changes to "follow," but does not actually unfollow the user (their content still appears in the home feed).
5	<b>Null song name</b>	2	If a user posts a review of a song, its title appears as "Null (song)" under their profile's reviews and in the home feed.
6	<b>Password Change</b>	2	004 - When a user tries to change their password, the "new password" field is <i>not</i> secured, and shows their password as it is typed in plain text.
7	<b>Password Change UI</b>	3	004 - Once a password is changed, the user's reviews are displayed again, and "PASSWORD CHANGE SUCCESSFUL" is displayed on the left side of the screen, overlapped by the navigation menu.
8	<b>Password Change Fails</b>	1	004 - Trying to change a password does not actually change it on the backend.
9	<b>No Error for Login</b>	2	002 - When a user attempts to login with an incorrect password, no error message is displayed.
10	<b>Delete Account UI</b>	3	004 - When a user attempts to delete their account,

			but enters the wrong password, the user's reviews are displayed again, and "INCORRECT PASSWORD" is displayed on the left side of the screen, overlapped by the navigation menu.
11	<b>Unauthenticated User Review Form</b>	1	001 - Unauthorized user posting: When a user is not logged in, the review form shows and lets the user attempt to post which causes the server to crash.
12	<b>Incorrect Content Under Headers</b>	2	005 - Browsing Content using Navbar: When a user selects the Movies header, they get a list of games instead of movies. If they select the Games header, they get a list of movies instead of games.
13	<b>Users Sign Up With Small or No Password</b>	1	003 - User Sign Up Password Boundary: User is able to sign up with password with less than 2 characters or even no characters
14	<b>User Sign Up With Existing Username</b>	1	User is able to sign up using a username that already exists as long as the email is different.
15	<b>Deleting Account Doesn't Delete User Content</b>	2	When a user deletes their account, any reviews they have posted are still available in the feeds and are not removed from the database.
16	<b>User Sign Up Password Max</b>	2	003 - User Sign Up Password Boundary: When a user tries to sign up with 16 characters, it gives an error and does not let the user sign up.
17	<b>User Can Follow Self</b>	2	Users are able to follow themselves which seems like it should not be a feature.
18	<b>Logout Fails to redirect to login page</b>	2	When user tries to logout, they are redirects to music review
19	<b>Fail to redirect after following</b>	3	When a user follows another user they are not redirected to another page or back to the reviews page. They are just left on that page until the press back button on the browser
20	<b>Average Score Incorrectly calculated</b>	1	The average score is the sum of ratings on the Category page (eg game) not the rate of the rating
21	<b>Fails to search for songs</b>	2	006 - when a user searches for a song they get no results for the song even though the song is on the

			list of reviews
22	<b>Server Error from Failed review posting due to large character count</b>	1	007 - when a user tries to post a review with more than 10,000 characters a server error (crash) is thrown not a handled error that makes sense to the user.
23	<b>HTML Error</b>	3	When a user clicks to see reviews in detail, On the on the left top corner of the page there is an arrow which indicates there is an html tag on the web page that's not closed
24	<b>Multiple Reviews of one Item</b>	3	When user make a review on an item, they are able to make multiple reviews on the same items as much as they want
25	<b>Empty text on review, is added to db without err-msg</b>	2	When a user is making a review a user may have an empty text on the form and after submitting, an empty text is added db without warning too
26	<b>Search bar not accessible</b>	2	When a user navigates to the books tab the search bar disappears and is not accessible to the user
27	<b>Fails to load image for movie item</b>	2	When a user navigates to a movie item, the poster images does not load and just displays a blank image.
28	<b>UI fails to scale appropriately to different sized devices</b>	3	When a user navigates to the website in a small form factor device like a smart phone the UI fails to scale appropriately.
29	<b>Cannot select items under games or books in search results</b>	1	When a user searches for an item, results under the games and books sections are not able to be selected and navigated to.
30	<b>Incorrect search section headers</b>	2	Section headers for search results are mixed up with movies showing game results, games showing movies and books showing songs.
31	<b>Deleting account does not delete rating scores</b>	1	When a user deletes their account the reviews they posted are delete but the score that their reviews had are still reflected in the sum.
32	<b>Can register a</b>	3	When a user is logged in they are still able to

	<b>new account while already logged in</b>		navigate to the registration page and register an account without logging out
<b>33</b>	<b>Can login to another account while already logged in</b>	<b>3</b>	When a user is logged in they are still able to navigate to the login page and login to another account without logging out
