Phase 2: High Order Testing Defect Log for My Critic

#	Defect	Severity	Type of High Order Testing	Test Case # OR Description
1	Unauthenticated User Review Form	1	Security	001 - Unauthorized user posting: When a user is not logged in, the review form shows and lets the user attempt to post which causes the server to crash.
2	Incorrect Content Under Headers	2	Usability	005 - Browsing Content using Navbar: When a user selects the Movies header, they get a list of games instead of movies. If they select the Games header, they get a list of movies instead of games.
3	Users Sign Up With Small or No Password	1	Security	003 - User Sign Up Password Boundary: User is able to sign up with password with less than 2 characters or even no characters
4	Multiple duplicate reviews being posted	2	Stress	If a user presses the submit review button multiple times in a row before the page reloads, the review gets posted as many times as the user has pressed the button
5	Deleting Account Doesn't Delete User Content	2	Performance	When a user deletes their account, any reviews they have posted are still available in the feeds and are not removed from the database.
6	User Sign Up Password Max	2	Volume	003 - User Sign Up Password Boundary: When a user tries to sign up with 16 characters, it gives an error and does not let the user sign up.
7	Server Crashes when Review is too long	2	Volume	When a review length is too long, the server crashes when trying to post the review. Tested with review with 92944 characters.
8	Server Crashes when Review contains Unicode character	2	Performance	When a review contains a unicode character such as an Emoji, the server crashes when trying to post the review.

9	UI fails to scale appropriately to different sized devices	3	Usability	When a user navigates to the website in a small form factor device like a smart phone the UI fails to scale appropriately.
10	Slow loading of background image in main screen	3	Performance	When navigating to website background image loads very slow
11	Password passed as plain text to delete password endpoint	1	Security	When deleting account POST request made to /deleteAccount endpoint includes password in plain text in form data.
12	Logout Fails to redirect to login page	2	Usability	When user tries to logout, they are redirects to music review
13	Browse mode load time differ	1	Performance	The app takes minutes to load on Incognito mode
14	Search results returns results if code is passed as input in search input box	2	Security	When a user inputs code for example " `$(".opacity-nav").fadeToggle("slow", "linear");` " some search results are displayed
15	Search Failed due to large character count	2	Volume	When a user tries to search a review with more than 15,000 characters a page fails to load or return anything
16	Server crash when review has 0 characters	1	Volume	When a user posts a review with no text in the textbox (but still has a rating), the server crashes.
17	User can create account with invalid email	2	Stress	When a user creates an account, they're able to enter an email that is not valid, such as: "sblatz@" and the account will be created.
